**GRIZZLY TESTED. POLARIS APPROVED.**

This cooler is IGBC-approved, meaning it withstands the power expended by a typical grizzly bear if it was trying to get inside. Seriously, there are experts who know what a grizzly is capable of doing, and they certify our coolers can take it.

**POLARIS NORTHSTAR COOLERS CAN SURVIVE JUST ABOUT ANYTHING - FROM EXTREME HEAT TO A NASTY TUMBLE OFF A VEHICLE.**

## FOR THE LIFE OF YOUR RIDE

### MAINTENANCE TIP

**BREAK-IN PERIOD**
The break-in period for your new RZR is the first 25 hours of operation, or three hours of operation, whichever comes first. A properly broken-in engine will result in more efficient performance and longer life for the engine.

**M.T.S.S.** Excessive heat build-up during the first three hours of operation can damage the engine. Always run your engine at full throttle and high speeds for extended periods during the first three hours of operation.

**HALF SHAFT**
Check for tear and punctures in the boot which can lead to CV joint wear and contribute to axle failure.

**THROTTLE**
Do not operate at full throttle or high speeds for extended periods. Do not operate at full throttle for more than three hours of operation. This can damage the engine.

**THREE HOURS OF OPERATION WILL DAMAGE THE ENGINE.**

**NOTICE:** Excessive heat build-up during the first three hours of operation can cause the engine to overheat. Use the first two tanks of fuel. No oil change will be necessary.

**BREAK-IN PERIOD**
The break-in period for your new RZR is the first 25 hours of operation or three hours of operation, whichever comes first. A properly broken-in engine will result in more efficient performance and longer life for the engine.

**IMPORTANT AS A PROPER BREAK-IN PERIOD.**
